

Resizing Photos for Vertical Images

1. Open PIXresizer
2. Click Load Picture and find the picture (where you have previously saved it)

Small Photo (use width 504)

3. In Select new size choose Custom size
4. Input 504 in 2nd box (1st box will adjust its size)
5. In Select file format choose Same as original
6. Click Save Picture and save picture to desktop

Large Photo (use width 1000)

7. In Select new size choose Custom size
8. Input 1000 in 2nd box (1st box will adjust its size)
9. In Select file format choose Same as original
10. Click Save Picture and save picture to desktop
11. Exit PIXresizer

Use the same name of the image when replacing photos

Look in image folder for website to see name of image

Rename photos saved on desktop from PIXresizer to match name of photo in image folder for website.

Example: Admin 540x... - change to Admin
 Admin 1000x... - change to Admin-Lg

Cut photos from Desktop and replace in image folder for website.
